

# ACC 199 - ACCOUNTING PRACTICUM

---

## Course Description

This course expands upon previously learned computerized general ledger accounting. Focuses on developing skills for application through the continued use of accounting software; including chart of accounts, journal entries, sales/receivables, expenses/accounts payable, payroll, and automated general ledger. Various projects are used and integrated to guide students through the accounting cycle including financial statements and a variety of special reports. Special emphasis is placed upon the preparation, interpretation, evaluation, and forecasting of financial information. This course requires students to have an electronic device capable of processing QuickBooks as well as spreadsheet software. Students are required to bring their own device to class. Group 2 course.
