

HDA 170 - PREVENTIVE DENTISTRY

Learning How to Learn:

- Identify sources of information related to preventive dentistry that will assist the student with being successful on board exams.

Course Description

This course deals with educating dental patients in proper oral hygiene and nutrition. The topics of discussion will include vitamins, minerals, fats, carbohydrates, proteins, food groups, fluoride treatments, oral examinations, pit and fissure sealants, public health dentistry, and oral hygiene instructions. Student demonstration and participation is emphasized. A dietary analysis will be learned and demonstrated by students. Two community presentations will be designed and presented by each student. Group 2 course.
