#### 1

# WSI 400 - MARINE TECHNOLOGY CAPSTONE

## **Course Description**

This course requires the synthesis and integration of knowledge and skills acquired across the Marine Technology curriculum for completion of a team oriented project and will require significant written, oral and visual deliverables including a final presentation. These field based projects will demonstrate a comprehensive approach to mission planning, technical equipment competency, budgeting, data collection/processing and dissemination to an audience. Group 2 course.

## **Credit Hours**

4

## **Contact Hours**

4

## **Lecture Hours**

4

## **Required Prerequisites**

WSI 390, WSI 405, WSI 433, WSI 440 can be taken concurrently.

## General Education Outcomes supported by this course

Communications - Direct, Critical Thinking - Direct

## **Course Learning Outcomes**

### Knowledge:

- · Define project requirements.
- · Execute system design.
- · Communicate outcomes to stakeholders.

#### Application:

 Apply tools and principles of physics, oceanography, meteorology, and climatology to solve marine problems.

#### Integration:

 Create a marine solution integrating marine knowledge and skill with project management and teamwork abilities.

#### **Human Dimension**

 Communicate project requirements, processes, and outcomes as part of a development team.

## **Caring - Civic Learning:**

• Assess the impact and value of a marine solution.

## Learning How to Learn:

• Experience the value of iterative and incremental development during a complex project with emergent requirements.
