General Education Outcomes supported by this course

Critical Thinking - Direct

Course Learning Outcomes

Knowledge:

- Discuss the 5 core concepts that the course addresses: Evolution, Structure and Function, Information Flow, Exchange and Storage, Pathways and Transformations of Energy Matter.

Application:

- Use the scientific problem solving process to make decisions.

Integration:

- Apply course concepts to real-life situations and experiences.

Human Dimension:

- Collaborate with peers.

Caring - Civic Learning:

- Elaborate on the growing value of science in society, especially as it relates to human health.

Learning How to Learn:

- Formulate useful questions about controversial subjects.
