

ENGINEERING TECHNOLOGY - PROGRAMMABLE LOGIC CONTROLLERS (PLC), CERTIFICATE OF ACHIEVEMENT (LEVEL I)

EET 234	PLC Applications II (Spring only)	3
Credits		6
Total Credits		18

The responsibility for determining the transferability of this degree and courses to another institution is the sole responsibility of the student.

NMC Code 076

Trained personnel who design, program, operate, service, and maintain these devices are performing duties that fit the job description of a programmable logic controller technician. They have the technical knowledge to set up electronic control systems for mechanical equipment, including integrating electrical wiring requirements to pneumatic and hydraulic systems. They also will learn system monitoring, debugging and troubleshooting operational problems, making repairs and performing preventive maintenance activities. There is a very high demand for trained individuals in this field as many industries have automated processes in which equipment and machines are computer-controlled. The curriculum is designed by industry experts to meet employer demands. Students receive hands-on training in our state-of-the-art lab.
